Summary

Front-end Developer focused on building clean, user-centered applications. Experienced in React, JavaScript, TypeScript, and Tailwind CSS, with a strong emphasis on translating Figma designs into responsive and accessible interfaces.

Core Competencies

React	JavaScript	TypeScript
Tailwind CSS	Figma	Supabase
Git	API Integration	Agile Development

Projects

SolarRise – Appointment & Admin Dashboard (Chingu Agile Team Project) ([Code](#) | [Site](#))
Tech: React, Vite, JavaScript, Tailwind CSS
- Implemented interactive modal workflows for appointment scheduling, including timeslot confirmation and appointment confirmation components.
- Added front-end logic to trigger confirmation modals based on user actions such as date selection and form submission.
- Developed a contact form modal triggered from the landing page, managing form state and front-end submission logic.

brilly – AI-Integrated Flashcard App (Two-Person Team Project) ([Code](#) | [Site](#))
Tech: React, Vite, TypeScript, Tailwind CSS, Supabase, OpenAI API
- Designed and implemented responsive flashcard UI components, focusing on clean interaction patterns and usability.
- Integrated OpenAI API to generate AI-assisted explanations, incorporating asynchronous API calls and front-end state management.

Atlanta Arm Candy (Freelance) ([Site](#))
Tech: Shopify Liquid, JavaScript, CSS
- Customized a Shopify theme using Liquid, JavaScript, and CSS to improve layout, visual hierarchy, and overall storefront presentation.
- Enhanced front-end structure and responsiveness across product and collection pages to create a more polished shopping experience.

Employment/Experience

Freelance Front-end Developer   03/2025 – 05/2025
Atlanta Arm Candy (Client) | Remote
- Implemented front-end UI improvements using Shopify theming and custom Liquid, HTML, and CSS to modernize a previously minimal interface.
- Collaborated directly with the client to gather requirements, iterate on designs, and translate business goals into user-focused interface updates.
- Delivered the redesigned storefront ahead of schedule, with the client reporting increased site traffic and higher sales following launch.

Software Developer   11/2024 – 12/2024
Chingu (Agile/SCRUM Workplace Simulation) | Remote

- Collaborated with a cross-functional Agile team of 9 to build *SolarRise*, a web application focused on solar energy evaluation and installation.
- Contributed to front-end development through feature implementation, GitHub pull requests, and peer code reviews, and sharing responsibility for reviewing and approving team contributions.
- Used Jira for sprint planning and Figma to interpret designs and translate them into responsive UI components.

Front-end Developer (Volunteer)   03/2024 – 06/2024
Hack for LA | Remote

- Contributed to a large-scale open-source civic tech project by implementing small-to-medium front-end changes through a GitHub-based issue and review workflow.

Histology Technician (IHC) Team Lead   03/2023 – Present
Histology Technician   02/2022 – 03/2023
Laboratory Assistant   08/2021 – 02/2022
Finan Templeton Dermatopathology Associates | Atlanta, GA

- Lead a cross-functional team responsible for 1,000+ immunohistochemistry (IHC) stains per month, balancing throughput, quality control, and turnaround time in a high-volume production environment.
- Improve team productivity by ~20% by optimizing workflows, identifying bottlenecks, and reallocating resources.
- Refine standard operating procedures (SOPs) to improve consistency, reduce errors, and streamline onboarding for new team members.

Education & Certifications

AWS Cloud Practitioner   2025

University of Georgia | B.S.A., Biological Sciences   2018
College of Agricultural and Environmental Sciences | Athens, GA
